Director, Science, Technology, and Globalization Project; Principal Investigator,
Agricultural Innovation in Africa

Dr. Julie Howard, Deputy Coordinator for Development, Feed the Future, USAID

Wednesday, January 18, 2011
2:00pm-4:00pm

B1 Conference Center
CSIS 1800 K St. NW, Washington, DC 20006

Please join us for the launch of the CSIS's Global Food Security Project's most recent publication on building partnerships to improve scientific capacity for African agricultural research. Ambassador Bill Garvelink, an expert on food security and an instrumental figure in the establishment of the Feed the Future initiative will provide framing remarks, followed by a detailed presentation of the report's findings with its two primary authors, Johanna Nesseth Tuttle and Jennifer Cooke.

To conclude, Dr. Calestous Juma from Harvard University and Dr. Roebert Bertram of USAID will discuss the most recent trends in agricultural research in Africa and respond to the arguments made in the paper. We hope you can join us for this timely event.
Refreshments will be served.

Please RSVP to Anna Applefield at aapplefield@csis.org.
